- **Sydney Based**
- **Generous pay (\$27-\$33/hour inc super for Casuals, depending on experience)**
- **Opal Card provided**
- **Industrial training and accreditation support**
- **Supportive team environment**

About your role

As a member of our solar installation team you will be responsible for the installation of solar photovoltaic power systems at a wide range of sites including commercial, industrial and government facilities. Systems will range from small scale to large commercial and industrial scale projects. You will work as part of a team lead by experienced, Accredited Solar Installers / Licensed Electricians and Project Managers. Technical and safety training will be provided with the wide range of projects and the extensive experience of our installation team providing an unrivalled environment for you to learn important skills required to succeed in this challenging industry. Other work activities may include assisting in commercial energy efficiency upgrades, site assessments and project scoping, inventory management and other duties. We are looking for enthusiastic, hardworking and practical individuals with a passion for renewable energy, looking to gain experience in this exciting industry with a professional and innovative company. Work hours can be flexible though for casuals a minimum availability of three full days per week is required, with 5 days availability being desirable.

About Us

Autonomous Energy is a 'full-service' energy solutions company - offering bespoke solar PV, energy storage, microgrid and energy efficiency services, projects and advice. We foster a culture of innovation and thrive on delivering a better technical result for our clients. Our reputation within the clean energy industry is second-to-none and we employ some of the most highly-skilled, respected renewable energy experts in the country. Over the past 15 years we have been awarded multiple prestigious industry awards, including the CEC's 'Best Solar Design and Installation in Australia' award on three occasions. Our mission is to reduce GHG emissions and facilitate the transition to sustainable energy systems as quickly and efficiently as possible.

See www.AutonomousEnergy.com for more details.

Requirements

- White Card
- Ability to work safely / comfortably at heights (training provided)
- Willingness to work hard in a role that involves physically demanding activity
- Willingness to work on projects in both metro and regional areas
- Ability to work both autonomously and in a dynamic team environment

If you feel this role is the opportunity that you have been looking for then please apply now by sending your resume and covering letter / email to hr@autonomousenergy.com in the first instance. Please include 'Casual Installation Team Member' in the subject line. As this is a new intake if you have applied before and not been successful you are welcome to apply again.
